

Ten Ways to Ask Students about their Thinking!

- Can you show me your thinking?
- How did you come up with that answer?
- What strategy did you use?
- How do you know?
- What are the steps you took?
- What did you do first? Then what did you do?
- Can you show me how you did it?
- Can you prove it?
- Will you explain how you did it?
- Did you count on your fingers? (give them a NON-EXAMPLE)
