## Problem Solving

**Question: Understand the question.**

Elaborate, Imagery, Rewrite the question as a statement

**Data: Find the data needed to solve the problem.**

What numbers do I need? Which don't I need?

**Plan: Develop a plan to solve the problem.**

How many steps will it take? What does the problem want to know?  
What operations will you do?

**Answer: Solve the problem with your plan.**

Solve each step. Show my work. Circle my answer.

**Check: Check to see if the answer is correct.**

Did I do every step in my plan? Did I make mistakes in my calculations? Does my answer match my image from step 1?
